

## STOREOGRAPHY TECHNICAL REQUIREMENTS

### SPECIFICS:

The lecture demonstration is one hour but can be shortened if need be. Workshops are generally 1 hours and include no more than 25 students. The workshops can also be as short as 45 minutes or as long as 2 hours. We offer two highly experienced master teaching artists and prefer to teach workshops simultaneously if possible. Simultaneous workshops must be in two separate spaces.

### SPACE REQUIREMENTS:

**Performance:** A clean, unobstructed stage space of no less than 24 X 20 is required for the performance. The space should be free for set-up one hour before the scheduled time of the show. If there is no proper backstage area, a space for changing costumes must be provided. A surface of wood or a marley type dance floor is preferred. If the space is a gym, it is not advisable to have more than three rows of students sitting on the floor due to poor sightlines.

**Workshop:** A space free of desks and chairs with ample room for 25 students to move freely is necessary for the workshops. In some cases the stage space can be used for one of the workshops.

### TECHNICAL REQUIREMENTS:

Please expect the performers one hour before the scheduled time of the performance and have someone who is knowledgeable about sound and lighting systems available to meet them. Our light requirements are flexible and we will use what is available. Please furnish both cassette and CD capabilities with appropriate amplification for the space. A microphone is also required. If need be, the microphone can be used to amplify a boom box. We will need someone from the school to help us run our sound. We would like to meet with that person one hour before the show.

### SPECIAL NEEDS:

If you have questions about meeting any of the above requirements or have special needs such as disabled or challenged students, please call us in advance to discuss appropriate arrangements.
